Notes:	

* These interviewees spent little to no time at the Santa Susana Field Laboratory and were based out of other Atomics International facilities.

The job titles reflected in this figure are self-reported titles from the time of employment. Historical job titles may not be equivalent to titles used today. This is particularly true of the title Engineer. A number of interviewees also had multiple job titles over their careers at the Santa Susana Field Laboratory. The job titles reflected in this figrue refer to those positions held the longest or during the period where information was used for the U.S. Environmental Protection Agency's historical site assessment.
